26 October 1955

MEMORANDUM FOR THE RECORD

SUBJECT: Definitive Contract No. FS-99 with
Hycan Manufacturing Company --
Project [REDACTED]

25X1A2d1

1. Letter Contract No. FS-99 was approved for issuance to the Contractor by memorandum dated 27 June 1955 signed by the Project Director and approved by the Director of Central Intelligence. This Letter Contract provided for the initiation of training of the teams of personnel required to service and maintain the photographic equipment being produced under Contract No. SC-21-5A with the Perkin-Elmer Corporation, and by the Hycan Manufacturing Company under a sub-contract with the Perkin-Elmer Corporation.

2. Letter Contract No. FS-99 committed \$134,200 for the training of some five personnel teams, plus certain supervisory personnel. The funds were obligated in fiscal year 1955 and chargeable to Project AQUATONE. This Definitive Contract reflects negotiations which have been carried out since the issuance of the Letter Contract and will replace the Letter Contract. Additional obligation of fiscal year 1956 funds in the amount of \$26,800 is required. The Definitive Contract will therefore have a full amount of \$161,000.

3. The Definitive Contract is a fixed-price type with provision for redetermination of price during the life of the contract. It provides funds for training personnel to compose five teams of five men each on the basis of estimates of cost provided by the Contractor. At the proper time the contract price will be reexamined, and, on the basis of cost experience, will be reduced by amendment and any excess funds recovered. It is considered extremely unlikely that any additional funds will be required in the future for the scope of work outlined in Contract No. FS-99.

5. Subsequent contractual arrangements will have to be made for overseas service of the teams to be trained under this contract. In addition, if found necessary for support of the project, contractual arrangements will have to be made to provide In-Plant Engineering Support, and Shop Support. The entire scope of work proposed by the Contractor, with estimates of cost, are contained in AERIAL SURVEYING EQUIPMENT, SUPPORT SERVICE PROPOSAL, 18 June 1953, revised 17 September 1953.
